Bank Bonds!
What? Really?
Have we time-shifted
to days of yore?

We haven't seen a Bond with a yield like this available for some time!

We like a good bond: with an independent income provided by an issuer that inspires confidence, but they have been very hard to find lately. Here, not only does the TD Bank offer a healthy yield, but the maturity date is far enough out that one may count on that income for some good time, until 2027, and the value at maturity is guaranteed by the issuer.

TD guarantees that maturity value to the holder of that bond: you, the individual client. The Market seems to be offering the canny investor a gift ...it almost feels like a step back in time!

Example: a TD Bond FF 2027 purchased today :
\$50,000 Face Value (Maturity Amount)
Cost: \$46,912
Yield: 5%

Cash Flow - \$1530 / year or \$765 every Jan/July
*as of June 29- 10AM and subject to change

Interest accrues daily and is paid out semi-annually in January & July
The bonds can be bought and sold on any business day.
