

Retirement Expense Worksheet

As you plan for your retirement, it is critical to consider your current expenses as well as your future expenses.

As you use the worksheet below to identify these expenses, keep the following points in mind:

- Remember to refer back to your goals to ensure you have captured all possible expenses.
- If you are looking for ways to reduce your expenses, determine if the expense is fixed (ie: something you need) or discretionary (ie: something you want).
- Think about which stage of retirement you are currently in, and the next stage you will be entering.

The stages of retirement are generally described as:

Early retirement – often a time of activity including spending time travelling or doing your favourite hobby. Many costs can add up during this time.

Middle retirement – individuals start to slow down the pace of activities. Financially, this is likely the stage when expenses are lower.

Later years – often a period where significant health considerations become a concern and, as a result, costs can rise.
