

## **How Technological Advancements Impact Estate Planning**

Technology advancements are having a significant impact in all aspects of our lives. As a result, traditional estate planning is changing quickly as well.

In this [BMO Wealth Institute Report](#), two specific challenges are identified;

- 1) Ongoing drug therapy developments are allowing us to live longer. However, it also increases the possibility that boomers may have to care not only for their aging parents, but for their growing children as well.
- 2) Digital assets such as music, books and movies may have considerable value and are often ignored in today's estate planning.

The article is thought provoking and educational. Please contact us if you have any specific questions.

Sincerely,

[The Ferrie Wealth Management Group](#)
